## **DETAILED ACTION**

### ***Prelim. Amdt/Amendment***

1. Receipt is acknowledged of the Amendment filed 29 March 2004.

### ***Allowable Subject Matter***

2. Claims 7-12 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of Sarchell Jr. et al, Peters and all other cited references, taken alone or in combination, fails to teach or fairly suggest the specific structure or the method of a combined system of automatic selling of products and services for automatic vending machines which comprises, among other things, the automatic vending machine being enabled to sell products while the service module renders a service, by means of said assignation of the payment means from the first display to the second display, via the service selection pushbutton as set forth in the claimed combinations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent to Mezei, Louis M. et al is cited as of interest and illustrate a similar structure to an apparatus and system of a combined system of automatic selling of products and services (e.g., "Once the user has directed the host computer 20 to start a particular task (such as liquid handling on a stack of plates) the computer will carry that operation through to completion. With that task under way, the user can use the terminal to select and initiate another function (such as printing a given document). In this way, the user can use the computer to execute multiple tasks "in the background", while the user interacts with the terminal "in the foreground"" (col. 41, lines 60-68).
